Index of Issues: July, pp. 1–120; August, pp. 121–232; September, pp. 233–376; October, pp. 377–522; November, pp. 523–640; December, pp. 641–772.

INDEX OF SUBJECTS

A

Acetylcholinesterase/butyrlcholinesterase ratio, diagnostic value of, in Hirschsprung's disease, 520
Acid phosphatase, tartrate-resistant, in hairy-cell leukemia, 459
Acquired immunodeficiency syndrome
  bone marrow pathology in, in pediatric population, 493
  central nervous system lymphoma in, stereotaxic biopsy for diagnosis of, 40
  cytomegaloviral adrenalitis and adrenal insufficiency in, 493
  group-specific component (Gc) alleles among Haitian immigrants and, 371
  plasma fibronectin values in, 293
Acute cellular rejection, use of renal medulla alone in diagnosis of, 493
Adenocarcinoma
  colorectal, immunohistochemical phenotyping of, with monoclonal antibodies, 493
  pancreatic, in adult, immunohistochemistry of CEA in fetal pancreas and, 17
  of prostate, comparison of Gleason score and nuclear roundness factor in, 493
Adenoma
  canalicular, trabecular, and monomorphic, fine-needle aspiration of, 46
  rectal, adenoma-carcinoma sequence in, 121
Adrenal function, in Cushing's syndrome, 345
Adrenal insufficiency, in AIDS, 493
Adrenalitis, cytomegalovirus, in AIDS, 493
Aerobic bacteria, antimicrobial susceptibility testing and, 355
Agarose gel patterns, of alkaline phosphatase isoenzymes, before and after treatment with neuraminidase, 181
AIDS-related complex
  plasma fibronectin values in, 293
  Sjogren's syndrome-like illness associated with, lip biopsies in, histopathology and lymphocyte immunophenotypes in, 493
Alanine aminotransferase, predonation screening for
  cost-effectiveness of, 493
  table-top analyzer for, 296
Alkaline gel electrophoresis, glycohemoglobin quantitation by, 493
Alkaline phosphatase isoenzymes, agarose gel patterns of, before and after treatment with neuraminidase, 181
Alkaptonuria, on osteoarthrosis of ochronotic origin, 95
Alpha-1-antichymotrypsin, immunoreactivity for, in different types of tumors, 131
Alpha-interferon, in hairy-cell leukemia, 459
Ameloblastoma, malignant, with pulmonary metastasis and hypercalcemia, 474
American Society of Clinical Pathologists, minutes of Annual Business Meeting of, 317
Amniotic fluid, lamellar bodies in, characterization by resistive-pulse counting, lung maturity and, 493
Anaerobic bacteria, antimicrobial susceptibility testing and, 355
Anemia
  hemolytic, chronic, pathogenesis of aplastic crisis in, 493
  iron deficiency
    differentiating from thalassemia minor, red cell discriminant function incorporating RDW for, 493
    ferritin and erythrocyte sedimentation rate to predict bone marrow iron stores in, 85
    red blood cell fragmentation and, 268
  microcytic, H-1 system to detect red cell abnormalities in, 493
  pernicious, pepsinogens and other serum markers in, 442
Angiomyolipomas, of kidney, relationship to cysts, tuberous sclerosis, and renal cell carcinoma, 493
Anisakiasis, intestinal, morphologic and immunologic diagnosis of, 107
Antibiotics, interference in phenylketonuria screening, 279
Antibiotic susceptibility, automated interpretation, statistical analysis, and clustering and, 493
Antibody, in immunohistochemistry, 333
Antibody elution, determination of need for, for direct antiglobulin tests, in pretransfusion testing, 58
Anticardiolipin antibody, ELISA for detection of, 591
Anticoagulants
  lupus, comparison of two new methods to platelet neutralization procedure, 493
  oral, therapeutic control of, 685
Antigen, in immunohistochemistry, 333
Antigen-antibody precipitin rings, plasminogen assay and, 200
Anti-leukocyte common antigen, in hairy-cell leukemia, 412
Antimicrobial drugs, susceptibility testing of, 355
Antipsychotic drugs, sudden death and, 493
Aorta, anomalous origin of coronary arteries from, with subsequent coursing between aorta and pulmonary trunk, 493
Aortitis, *Pseudoallescheria boydii,* following coronary artery bypass surgery, 493
Apatite crystals, on osteoarthrosis of ochronotic origin, 95
API 20s, identification of *Viridans* streptococci by, 87
Aplastic crisis, pathogenesis of, in chronic hemolytic anemia, 493
Arias-Stella phenomenon, diagnosis of extrauterine pregnancy and, 284
Aspergillus nidulans var. *echinulatus,* in chronic granulomatous disease of childhood, 312
Astrocytes, in immature teratomas, 397
Astrocytoma, prognosis of, correlation of DNA content and histology in, 289
Atherosclerosis
  elevated cholesterol levels in, detection, evaluation, and treatment of, 358
  of toxemia, endometrial changes similar to, as marker for intrauterine pregnancy, 284
Atherosclerotic plaque, "hot tip" laser probe ablation of, 493
Automation, of blood counts, 268
  detection of positive blood cultures by Bactec NR660 and, 91
  stability of results in healthy subjects and, 262
  to triage blood specimens for microscopic examination, 163
Autopsy, occult carcinomas of thyroid at, 72
Avidin-biotin-peroxidase complex, immunostaining of paraffin sections and, 33

B

Bactec 460-TB cultures, negative, incubation time for, 493
Bactec 660, detection of positive blood cultures by, 91
Bacteremia/septicemia, detection of positive blood cultures by Bactec NR660 in, 91

Index of Issues: July, pp. 1–120; August, pp. 121–232; September, pp. 233–376; October, pp. 377–522; November, pp. 523–640; December, pp. 641–772.

INDEX OF SUBJECTS

A

Acetylcholinesterase/butyrlcholinesterase ratio, diagnostic value of, in Hirschsprung's disease, 520
Acid phosphatase, tartrate-resistant, in hairy-cell leukemia, 459
Acquired immunodeficiency syndrome
  bone marrow pathology in, in pediatric population, 493
  central nervous system lymphoma in, stereotaxic biopsy for diagnosis of, 40
  cytomegaloviral adrenalitis and adrenal insufficiency in, 493
  group-specific component (Gc) alleles among Haitian immigrants and, 371
  plasma fibronectin values in, 293
Acute cellular rejection, use of renal medulla alone in diagnosis of, 493
Adenocarcinoma
  colorectal, immunohistochemical phenotyping of, with monoclonal antibodies, 493
  pancreatic, in adult, immunohistochemistry of CEA in fetal pancreas and, 17
  of prostate, comparison of Gleason score and nuclear roundness factor in, 493
Adenoma
  canalicular, trabecular, and monomorphic, fine-needle aspiration of, 46
  rectal, adenoma-carcinoma sequence in, 121
Adrenal function, in Cushing's syndrome, 345
Adrenal insufficiency, in AIDS, 493
Adrenalitis, cytomegalovirus, in AIDS, 493
Aerobic bacteria, antimicrobial susceptibility testing and, 355
Agarose gel patterns, of alkaline phosphatase isoenzymes, before and after treatment with neuraminidase, 181
AIDS-related complex
  plasma fibronectin values in, 293
  Sjogren's syndrome-like illness associated with, lip biopsies in, histopathology and lymphocyte immunophenotypes in, 493
Alanine aminotransferase, predonation screening for
  cost-effectiveness of, 493
  table-top analyzer for, 296
Alkaline gel electrophoresis, glycohemoglobin quantitation by, 493
Alkaline phosphatase isoenzymes, agarose gel patterns of, before and after treatment with neuraminidase, 181
Alkaptonuria, on osteoarthrosis of ochronotic origin, 95
Alpha-1-antichymotrypsin, immunoreactivity for, in different types of tumors, 131
Alpha-interferon, in hairy-cell leukemia, 459
Ameloblastoma, malignant, with pulmonary metastasis and hypercalcemia, 474
American Society of Clinical Pathologists, minutes of Annual Business Meeting of, 317
Amniotic fluid, lamellar bodies in, characterization by resistive-pulse counting, lung maturity and, 493
Anaerobic bacteria, antimicrobial susceptibility testing and, 355
Anemia
  hemolytic, chronic, pathogenesis of aplastic crisis in, 493
  iron deficiency
    differentiating from thalassemia minor, red cell discriminant function incorporating RDW for, 493
    ferritin and erythrocyte sedimentation rate to predict bone marrow iron stores in, 85
    red blood cell fragmentation and, 268
  microcytic, H-1 system to detect red cell abnormalities in, 493
  pernicious, pepsinogens and other serum markers in, 442
Angiomyolipomas, of kidney, relationship to cysts, tuberous sclerosis, and renal cell carcinoma, 493
Anisakiasis, intestinal, morphologic and immunologic diagnosis of, 107
Antibiotics, interference in phenylketonuria screening, 279
Antibiotic susceptibility, automated interpretation, statistical analysis, and clustering and, 493
Antibody, in immunohistochemistry, 333
Antibody elution, determination of need for, for direct antiglobulin tests, in pretransfusion testing, 58
Anticardiolipin antibody, ELISA for detection of, 591
Anticoagulants
  lupus, comparison of two new methods to platelet neutralization procedure, 493
  oral, therapeutic control of, 685
Antigen, in immunohistochemistry, 333
Antigen-antibody precipitin rings, plasminogen assay and, 200
Anti-leukocyte common antigen, in hairy-cell leukemia, 412
Antimicrobial drugs, susceptibility testing of, 355
Antipsychotic drugs, sudden death and, 493
Aorta, anomalous origin of coronary arteries from, with subsequent coursing between aorta and pulmonary trunk, 493
Aortitis, *Pseudoallescheria boydii,* following coronary artery bypass surgery, 493
Apatite crystals, on osteoarthrosis of ochronotic origin, 95
API 20s, identification of *Viridans* streptococci by, 87
Aplastic crisis, pathogenesis of, in chronic hemolytic anemia, 493
Arias-Stella phenomenon, diagnosis of extrauterine pregnancy and, 284
Aspergillus nidulans var. *echinulatus,* in chronic granulomatous disease of childhood, 312
Astrocytes, in immature teratomas, 397
Astrocytoma, prognosis of, correlation of DNA content and histology in, 289
Atherosclerosis
  elevated cholesterol levels in, detection, evaluation, and treatment of, 358
  of toxemia, endometrial changes similar to, as marker for intrauterine pregnancy, 284
Atherosclerotic plaque, "hot tip" laser probe ablation of, 493
Automation, of blood counts, 268
  detection of positive blood cultures by Bactec NR660 and, 91
  stability of results in healthy subjects and, 262
  to triage blood specimens for microscopic examination, 163
Autopsy, occult carcinomas of thyroid at, 72
Avidin-biotin-peroxidase complex, immunostaining of paraffin sections and, 33

B

Bactec 460-TB cultures, negative, incubation time for, 493
Bactec 660, detection of positive blood cultures by, 91
Bacteremia/septicemia, detection of positive blood cultures by Bactec NR660 in, 91

Bacteria
aerobic and anaerobic, antimicrobial susceptibility testing and, 355
colonization of, gastric lesions by urease-positive, 749
visualization of, significance of, in peripheral blood smears, 493
Barrett's esophagus, absence of *Campylobacter*-like organisms in, 493
Blood-brain barrier, in rabbits, gentamicin sulfate and, ultrastructural changes in, 493
Blood counts, automated, 268
detection of positive blood cultures by Bactec NR660 and, 91
stability of results in healthy subjects and, 262
to triage blood specimens for microscopic examination, 163
Blood culture, adequacy of 10 ML DuPont Isolator for, 493
Blood donors
alanine aminotransferase screening of, table-top analyzer for, 296
evaluating need for information during immediate post-donation phase, 493
predonation screening for alanine amino transferase, cost-effectiveness of, 493
Blood drawing, effect of drawing blood samples proximal to in-place but discontinued intravenous solution, 702
Blood film, enumeration and sex difference of large granular lymphocytes and, 674
Blood group substances, in adenoma-carcinoma sequence in rectal adenomas, 121
Blood smears, peripheral, significance of visualization of bacteria in, 493
Blood vessels, decidual changes in, as marker for intrauterine pregnancy, 284
Blowflies, in scalp, 734
Blue nevus, of prostate, 530
B-lymphocytes
clonal, proliferation of, in infant with congenital HIV infection and immune thrombocytopenia, 470
polyclonality of, in lymphofollicular hyperplasia of thymus, 493
Bone biopsies, renal osteodystrophy and, 493
Bone isoenzymes, agarose gel patterns of, before and after treatment with neuraminidase, 181
Bone lesions, benign, 377
Bone marrow
autologous transplantation of, immunophenotypic heterogeneity and, 149
biopsies of
from AIDS patients, histochemical evaluation of, 493
in hairy-cell leukemia, anti-leukocyte common antigen and, 412
in extranodal non-T-cell lymphoblastic lymphoma, in adults, 602
in infants with congenital HIV infection and immune thrombocytopenia, 470
iron stores in, in anemic patients, ferritin and erythrocyte sedimentation rate to predict, 85
micrometastases in, histopathologic features of primary tumor and prognosis in breast cancer and, 1
nongranulomatous involvement of, in lepromatous leprosy, 493
occupational leukopenia and, hematologic evaluation of, 679
pathology of, in pediatric AIDS population, 493
pseudo-Gaucher cells in, preceding appearance of immunoblastic lymphoma, 454
transplant of, usefulness of reticulocyte count for determination of successful engraftment in, 493
Bone marrow dissemination, of epithelioid sarcoma, 723
Bone marrow fibrosis, in multiple myeloma, 753
Book Reviews, 639, 742
Brain tumors
imprints, smears, and frozen sections of, 493
stereotaxic biopsy diagnosis of, 40
Breast
benign biopsies of, predictive value of elastosis in, 493
biopsy of, common reactive erythrophagocytosis and, 189
plasma cell granuloma of, 627
Breast cancer
comparative distribution of fibronectin and vitronectin in, 7
DNA analysis in, by flow cytometry, 493
estrogen receptor in
comparison of methods for determination of, 583
immunocytochemical detection of, 137
immunohistochemistry of, 559
marker for, gross cystic disease fluid protein-15 as, 493
micrometastases, histopathologic features of primary tumor, and prognosis in, 1
progesterone receptor in, immunocytochemical detection of, 137
Bromelain, immunostaining of paraffin sections and, 33
Brown-Brenn staining, for identifying *Campylobacter pylori*, 450

C

CA-125, in effusions, measuring decision values for, 493
Calcium oxalate, in sarcoid granulomas, 545
Calibration, as source of imprecision in cholesterol determinations, patient risk classification and, 493
Campylobacter pylori
evaluation of staining methods for identifying, 450
gastritis mediated by, mucus depletion in, 493
prevalence in normal population, 711
rapid detection of, by Gram's stain, 606
Cancer
of breast
comparative distribution of fibronectin and vitronectin in, 7
DNA analysis in, by flow cytometry, 493
estrogen receptor in
comparison of methods for determination of, 583
immunocytochemical detection of, 137
immunohistochemistry of, 559
marker for, gross cystic disease fluid protein-15 as, 493
micrometastases, histopathologic features of primary tumor, and prognosis in, 1
progesterone receptor in, immunocytochemical detection of, 137
of head and neck, relationship of circulating IgA and cellular immunity in, 493
of prostate, premalignant phase of, impaired cell differentiation in, 23
Cannabinoids, urinary, comparison of immunochemical assays for, 493
Carcinoembryonic antigen
analysis of ploidy and, in malignant epithelial mesothelioma, 240
in effusions, measuring decision values for, 493
in fetal pancreas, adult pancreatitis and pancreatic adenocarcinoma and, 17
Carcinoid
bronchial, neuroendocrine differentiation in, 641
pulmonary and gastrointestinal, differential expression of epithelial and neuroendocrine antigens in, 493
Carcinoma
adenoid cystic, of head and neck, nuclear DNA content and histologic grading of, 493
of breast
comparative distribution of fibronectin and vitronectin in, 7
estrogen and progesterone receptor in, immunocytochemical detection of, 137
evaluation by computer-assisted image analysis, 233
of colon, comparative distribution of fibronectin and vitronectin in, 7
hepatocellular
cholangiosarcoma combined with, with variable sarcomatous transformation, 309
deposition and drainage of iodized oil in, 536

mucoepidermoid, benign glandular inclusions in parotid nerve and, 220
occult, of thyroid, 72
pancreatic, in adult, immunohistochemistry of CEA in fetal pancreas and, 17
of prostate, labeling index and flow cytometry of, in needle biopsies, 493
renal cell, adenomyolipomas of kidney related to, 493
sarcomatoid, of urinary bladder, 653
in Schneiderian papillomas, spectrum of, 493
small cell, of ovary, ultrastructural analysis of, 523
squamous
detection of human papillomavirus in, using polymerase chain reaction, 493
flow cytometric analysis of, in head and neck, 493
or prostate, 597
thymic, differentiating thymomas from, Ki-67 and T6 (CD1) in, 493
transitional cell, of urinary bladder, with pseudosarcomatous stroma, 216
Carcinoma antigens, in adenoma-carcinoma sequence in rectal adenomas, 121
Cardiac enzyme studies, false negative, in acute myocardial infarction, 493
Cation-exchange chromatography, analysis of glycosylated hemoglobins by, in hemoglobinopathies, 697
CD4 cell count, estimation using Technicon H-1 automated hematology analyzer, 493
Cell-cycle proliferation, in astrocytoma, flow cytometric analysis of, 289
Cell differentiation, impaired, in prostate carcinogenesis, 23
Cellular immunity, relationship to IgA, in head and neck cancer, 493
Central nervous system, lymphoma of
immunohistochemical and clinicopathologic study of, 493
stereotaxic biopsy diagnosis of, 40
Cerebrospinal fluid, abnormal parameters of, in neurosarcoidosis, 493
Cerebrospinal fluid trap, 707
Chemistry tests, effects of hemolysis on, correction of, 493
Chemotherapy
cytotoxic, in acute myelogenous leukemia, 464
in hairy-cell leukemia, anti-leukocyte common antigen and, 412
red blood cell fragmentation and, 268
Chlamydia trachomatis, immunodiagnostic methods for, 205
Chloramphenicol, serum measurements of, using Apgar diffusion bioassay, EMIT Immunoassay, and high-performance liquid chromatography, 493
Cholangiosarcoma, hepatocellular carcinoma combined with, with variable sarcomatous transformation, 309
Cholesterol
elevated levels of, detection, evaluation, and treatment of, 358
high-density, elevated, detection, evaluation, and treatment of, 358
low-density, elevated, detection, evaluation, and treatment of, 358
Cholesterol clefts, in xanthoma, of bone, 377
Cholesterol determinations, calibration as source of imprecision in, patient risk classification and, 493
Chromatography
cation-exchange, analysis of glycosylated hemoglobins by, 697
liquid, high-performance, analysis of glycosylated hemoglobins by, 697
Chromogranin, in immature teratomas, 397
Chromogranin A, in small cell and non-small cell lung cancers, neuroendocrine differentiation and, 641
Cirrhosis, diagnosis and prognosis of, stereological parameters in, 493
CK-MB isoenzyme, quantification of, 613
comparison of methods for, in patients suspected of having myocardial infarction, 493
Coagulopathy, in fat overload syndrome, 223
Cobalt chloride intensification, estrogen receptors in paraffin sections and, immunohistochemistry of, 559
Colitis
diversion, 493
nonspecific, in patients with nonspecific chronic lower abdominal symptoms, 493
Colon cancer
comparative distribution of fibronectin and vitronectin in, 7
with pulmonary metastasis and hypercalcemia, 474
Colonopathy, tropical, 493
Colorectal adenocarcinoma, colorectal, primary, in young adults, correlation of histology, flow cytometry, and clinical data in, 493
Community hospital, manpower needs for pathology in, 482
Compatibility testing, for platelets, solid red blood cell adherence method for, 63
Complete blood count, stability of, in healthy subjects, 262
Computer analysis
blood counting and, to triage blood specimens for microscopic examination, 163
image analysis, evaluation of estrogen receptor in breast carcinoma by, 233
Coronary artery(ies)
disease of, elevated cholesterol levels in, detection, evaluation, and treatment of, 358
intraluminal thrombosis of, failed aorto-coronary saphenous vein grafts and, 493
plaque composition in, in fatal acute myocardial infarction, 493
right or left, anomalous origin of, with subsequent coursing between aorta and pulmonary trunk, 493
Coronary artery bypass surgery, *Pseudoallescheria boydii* aortitis following, 493
Cost analysis
of detection of positive blood cultures by Bactec NR660, 91
of table-top analyzer for alanine aminotransferase, 296
in testing for respiratory syncytial virus, 175
Coulter S + VI differential, with eosinophilia and basophilia flags, 493
Creatine kinase, total, measurement of, 613
Crossmatch, for platelets, 114
for alloimmunized thrombocytopenic patient, 69
solid red blood cell adherence method for, 63
Cryptococcal antigen, cerebrospinal fluid trap and, 707
Crystals, calcium oxalate, in sarcoid granulomas, 545
C3bi receptor, upregulation of, by recombinant human tumor necrosis factor, 493
Cushing's disease, screening and workup of, laboratory testing in, 345
Cushing's syndrome, screening and workup of, laboratory testing in, 345
Cyst(s)
adenomyolipomas of kidney related to, 493
lymphoepithelial, benign, of parotid gland, in HIV-positive patients, 493
Cystic fibrosis, marker for clinical exacerbation of, 493
Cytochemistry, in acute nonlymphocytic leukemia, terminal deoxynucleotidyl transferase and, 421
Cytodiagnosis, of melanoma, 77
Cytokeratin
in malignant epithelial mesothelioma, 240
in sarcomatoid carcinoma of urinary bladder, 653
Cytology
histology compared with, fine-needle aspirates of lung and, 493
immunoreactivity of monoclonal antibodies and, in ovarian carcinoma, 391
of monomorphic adenoma, 46
of products of conception, effectiveness of, 493

"salvage," endoscopic, detection of metastatic neoplasms in stomach through, 493
Cytomegalovirus infections
detection of, comparison of *in situ* hybridization with immunohistology in, 493
of fetal islets of Langerhans, 52
Cytopathology, interventional, 351

D

Decidua, vascular changes in, as marker for intrauterine pregnancy, 284
Deep venous thrombosis, inflammatory bowel disease and, protein S and, 633
Dendritic cells, in juvenile chronic myeloid leukemia, 575
Deposition, of lipiodol, in hepatocellular carcinoma, after injection into feeding hepatic artery, 536
Dermatopathology, database management system for, 493
Dexamethasone suppression test, in Cushing's syndrome, 345
Diabetes mellitus, insulin-dependent, cytomegalovirus infection of fetal islets of Langerhans and, 52
Differentiation, in squamous metaplasia of prostate, 597
Dipstick urine screening tests
ranking and evaluating, 118
urinary proteins and, 493
Direct antiglobulin test
hypergammaglobulinemia and, 197
in pretransfusion testing, determination of need for elution studies in, 58
Direct immunofluorescence assay, in *Chlamydia trachomatis*, 205
Disease, mathematical models of, utilizing microcomputers for extraction of clinical and laboratory data, 493
DNA
in adenoid cystic carcinomas, of head and neck, 493
in astrocytoma, flow cytometric analysis of, 289
constitutional, in leukemia, 187
DNA analysis
analysis of ploidy and, in malignant epithelial mesothelioma, 240
in breast cancer, by flow cytometry, 493
DNA aneuploidy, in Hodgkin's disease, prognostic value of, 670
DNA index, in Hodgkin's disease, prognostic value of, 670
DNA mapping, in α-thalassemia, 193
DNA polymorphism, to JH region of immunoglobulin heavy chain gene, in leukemia, 187
DNA probes, in diagnostic pathology, 340
DNase estrogen receptors in paraffin sections and, immunohistochemistry of, 559
Dolomite, in sarcoid granulomas, 545
Drainage, of ultra fluid (Lipiodol), in hepatocellular carcinoma, after injection into feeding hepatic artery, 536
DRC-1 monoclonal antibody, in mantle zone lymphoma, immunohistochemical study of, 143
Drug screening, peripartum, 493
Duodenitis, prevalence in normal population, 711

E

Effusions
decision values for CEA and CA-125 in, 493
in ovarian carcinoma, reactive with monoclonal antibodies, 391
Elastic fiber, in breast and colon carcinomas, 7
Elastosis, predictive value of, in benign breast biopsies, 493
Electron microscopy
immature neural elements and, in immature teratomas, 397
in small cell carcinoma of ovary, 523
Electrophoresis, alkaline phosphatase isoenzymes and, agarose gel patterns of, before and after treatment with neuraminidase, 181
Elution, hypergammaglobulinemia and, 197
Embryology, 366
Endocrine cells, pulmonary, in small cell and non-small cell lung cancers, 641
Endothelial cell marker, in Kaposi's sarcoma, phenotype differentiation of, 493
Enterococci, identification by pyrrodonyl aminopeptidase, 210
Entero-vesical fistula, in Fabry's disease, 726
Enzyme immunoassay
in *Chlamydia trachomatis*, 205
for detection and quantitation of anticardiolipin antibody, 591
in intestinal anisakiasis, 107
in testing for respiratory syncytial virus, 175
Eosinophilia, in acute myelogenous leukemia, 464
Eosinophil major basic protein, in acute myelogenous leukemia, 464
Eosin staining, for identifying *Campylobacter pylori*, 450
Ependymal differentiation, in immature teratomas, 397
Epithelial antigens
differential expression of, in pulmonary and gastrointestinal carcinoid tumors, 493
in malignant epithelial mesothelioma, 240
micrometastases in bone marrow and, 1
in sarcomatoid carcinoma of urinary bladder, 653
Epstein-Barr virus, in hairy leukoplakia, 305
Erlich, Paul, 329
Erythrocyte sedimentation rate, to predict bone marrow iron stores, in anemic patients, 85
Erythrophagocytosis, common reactive, in axillary lymph nodes, 189
Estrogen receptor
in breast cancer
comparison of methods for determination of, 583
immunocytochemical detection of, 137
primary, evaluation by computer-assisted image analysis, 233
detection with monoclonal antibodies, in paraffin sections, 120
in human ascending aorta, immunocytochemical localization of, 493
immunohistochemistry of, in paraffin sections, 559

F

Fabry's disease, lymphadenopathy and entero-vesical fistula in, 726
Fat overload syndrome, coagulopathy in, 223
Females, urethral neoplasms in, 493
Ferritin, to predict bone marrow iron stores, in anemic patients, 85
Fetus
CEA in pancreas of, adult pancreatitis and pancreatic adenocarcinoma and, 17
cytomegalovirus infection of islets of Langerhans with, 52
lung maturity in, characterization of amniotic fluid lamellar bodies and, 493
Fibrin glue, human, clotting of, viscoelastic coagulation analyzer to measure kinetics of, 493
Fibrinolysis, primary, in fat overload syndrome, 223
Fibronectin
in AIDS and ARC, 293
in breast and colon carcinomas, 7
Fibrosis
multifocal, 715
in xanthoma, of bone, 377
Ficin, proteolysis with, for immunostaining of paraffin sections, 33
Ficin, in immunohistochemistry, 754
Fine needle aspiration
in interventional cytopathology, 351
of monomorphic adenoma, 46

Fistula, entero-vesical, in Fabry's disease, 726
Flow cytometry
analysis of ploidy and, in malignant epithelial mesothelioma, 240
in analysis of squamous carcinomas, of head and neck, 493
of angiomatoid malignant fibrous histiocytoma, 493
DNA analysis by, in breast cancer, 493
in Hodgkin's disease, prognostic value of DNA ploidy and proliferative activity and, 670
in prostate carcinoma, in needle biopsy, 493
Fluorogenic synthetic substrate, plasminogen changes assayed by, radioimmunodiffusion assays compared with, 200
Foamy cells, in Fabry's disease, 726
in xanthoma, of bone, 377
Folate, deficiency of, serum homocysteine as indicator of, 446
Frozen sections, of brain tumors, 493
Fusarium, 493
Fusarium solani osteomyelitis, with probable nosocomial spread, 758

G

Gastric lesions
colonization of, by urease-positive bacteria, 749
Gastric lymphoma, 493
Gastrin, in pernicious anemia, 442
Gastritis
Campylobacter pylori associated, rapid diagnosis of, by Gram's stain, 606
Campylobacter pylori mediated, mucus depletion in, 493
prevalence in normal population, 711
Gene rearrangements, in non-Hodgkin's lymphoma of ovary, 156
Gentamicin pharmacokinetics service, usefulness in high-risk pediatric patients, 493
Gentamicin sulfate, blood-brain barrier and, in rabbits, ultrastructural changes in, 493
Giant cells, in xanthoma, of bone, 377
Giemsa staining, for identifying *Campylobacter pylori,* 450
Gleason score, nuclear roundness factor compared with, in evaluation of adenocarcinoma of prostate, 493
Glial fibrillary acidic protein, in immature teratomas, 397
Glioblastoma multiforme
anaplastic astrocytomas and, 289
renin in, role in neovascularization, 437
Glucose tolerance, abnormal relationship to acute phase multiple sclerosis, 493
Glycohemoglobin quantitation, by alkaline gel electrophoresis, 493
Gonadoblastoma, unilateral, microscopic, in prepubertal Turner mosaic, restriction fragment analysis in, 622
GPI card, identification of *Viridans* streptococci by, 87
Gram's stain, rapid diagnosis of *Campylobacter pylori* by, 606
Granuloma
plasma cell, of breast, 627
sarcoid, calcium oxalate in, 545
Granulomatous disease, chronic, of childhood, *Aspergillus nidulans* var. *eichinulatus* and, 312
Gross cystic disease fluid protein-15, as marker for breast cancer, 493
Group-specific component (Gc), among Haitian immigrants, 371
Gynecology, 362, 366

H

Haitians, group-specific component among, 371
Haptoglobin, serum, hypergammaglobulinemia and, 197
Heart, metastatic neoplasms to, 493
Hematogones, in infant with congenital HIV infection and immune thrombocytopenia, 470
Hematologic antigens, immunostaining of paraffin sections and, 33
Hematologic parameters, stability of, in healthy subjects, 262
Hematoxylin bodies, in skeletal muscle biopsy, 731
Hematoxylin staining, for identifying *Campylobacter pylori,* 450
HemoCue, for measurement of hemoglobin levels, 302
Hemodialysis, uremic patients on, *in vitro* lymphocyte responsiveness of, 493
Hemoglobin(s)
glycosylated, comparative analysis by ion-exchange column chromatography and high-performance liquid chromatography, 697
HemoCue system for measurement of, 302
Hemoglobin Constant Spring, in α-thalassemia, 193
Hemoglobinopathy, glycosylated hemoglobins in, comparative analysis by ion-exchange column chromatography and high-performance liquid chromatography, 697
Hemolysis
effects on chemistry tests, correction of, 493
hypergammaglobulinemia and, 197
Hemolytic disease, mild, of newborn, 493
Hemosiderin deposition, in axillary lymph nodes, breast biopsy and, 189
Hepatocellular-cholangiosarcoma, combined, with variable sarcomatous transformation, 309
Hereditary hemorrhagic telangiectasia, 274
Hertig, Arthur, interview with, 366
High-performance liquid chromatography, analysis of glycosylated hemoglobins by, in hemoglobinopathies, 697
Hip disease, on osteoarthrosis of ochronotic origin, 95
Hirschsprung's disease, diagnostic value of acetylcholinesterase/butyrlcholinesterase ratio in, 520
Histiocytes
alpha-1-antichymotrypsin reactivity of, 131
in juvenile chronic myeloid leukemia, 575
Histiocytoma, fibrous, malignant, malignant melanoma and, immunohistochemical and ultrastructural differential diagnosis of, 493
Histiocytosis, sinus
in axillary lymph nodes, 189
with massive lymphadenopathy, 641
Histochemistry, of bone marrow biopsies, from AIDS patients, 493
Histogenesis, of chondroid syringomas, 662
Histology
cytology compared with, fine-needle aspirates of lung and, 493
grading of adenoid cystic carcinomas and, of head and neck, 493
three-dimensional reconstruction from, using microcomputer, 493
Histopathology
in lip biopsies, from patients with Sjogren's syndrome-like illness associated with ARC, 493
micrometastases, histopathologic features of primary tumor, and prognosis and, in breast cancer, 1
HMB-45
antibodies to, in immunohistochemistry of malignant melanoma, 493
S-100 protein compared with, 385
immunoperoxidase staining with, in diagnosis of melanoma, 77
Hodgkin's disease, prognostic value of DNA ploidy and proliferative activity in, 670
Homocysteine, serum, as indicator of Vitamin B_{12} and folate status, 446
Hospital, community, manpower needs for pathology in, 482
Hospital economics, of detection of positive blood cultures by Bactec NR660, 91
Host cell infiltrates, in follicular lymphoma, with and without spontaneous regression, 257
Human chromosome 1, in acute myelogenous leukemia, 464
Human immunodeficiency virus
hairy leukoplakia in, ultrastructural detection of herpes-type virions in, 305

heterophil-negative mononucleosis-like illness in seroconversion to, 169
in infants, immune thrombocytopenia and, clonal B-cell proliferation in, 470
use of alkaline phosphatase conjugated oligonucleotide probes to detect, in cell and tissue samples, 493
Human papillomavirus, detection of, in invasive squamous carcinoma, using polymerase chain reaction, 493
Hürthle cell tumors, of thyroid, clinical outcome of, 493
Hyalohyphomycosis, 738
Hybridization, *in situ*, determination of immunoglobulin V_H gene expression by, 493
Hypercalcemia
malignant ameloblastoma with, 474
in small cell carcinoma, of ovary, 523
Hypercholesterolemia, detection, evaluation, and treatment of, 358
Hypercoagulability, inflammatory bowel disease with deep venous thrombosis and, 633
Hypercorticolism, in Cushing's syndrome, 345
Hypereosinophilic syndrome, in acute myelogenous leukemia, 464
Hypergammaglobulinemia, direct antiglobulin test and high serum immunoglobulin G values in, 197
Hyperploidy, in malignant epithelial mesothelioma, 240
Hyphal elements, in chronic granulomatous disease of childhood, 312

I

Immune thrombocytopenic purpura, in infants, congenital HIV infection and, clonal B-cell proliferation in, 470
Immunity, cellular, relationship to IgA, in head and neck cancer patient, 493
Immunoassay
in AIDS and ARC, plasma fibronectin values and, 29
enzyme
in *Chlamydia trachomatis*, 205
in testing for respiratory syncytial virus, 175
for measurement of urinary cannabinoids, comparison of, 493
Immunoblot technology, adaptation of, for rapid typing of paraproteins, 493
Immunocytochemistry
detection of estrogen and progesterone receptors by, in human breast cancer, 137
immunoreactivity of monoclonal antibodies and, in ovarian carcinoma, 391
localization of estrogen receptor in ascending aorta by, 493
micrometastases, histopathologic features of primary tumor, and prognosis and, in breast cancer, 1
in sarcomatoid carcinoma of urinary bladder, 653
Immunocytology, urine sediment examination and, using monoclonal antibodies, 691
Immunoelectron microscopy, Leu-4 (CD3) antigen expression in neoplastic cells and, from T-ALL and T-lymphoblastic lymphoma, 244
Immunofluorescence, 333
distribution of fibronectin and vitronectin in breast and colon carcinomas and, 7
Immunofluorescent antibody, in intestinal anisakiasis, 107
Immunoglobulin(s)
gene rearrangement of, in leukemia, 187
monoclonal, in mantle zone lymphoma, 143
Immunoglobulin A, relationship to cellular immunity, in head and neck cancer, 493
Immunoglobulin G, in hypergammaglobulinemia, 197
Immunoglobulin gene rearrangement, in infant with congenital HIV infection and immune thrombocytopenia, 470
Immunoglobulin V_H gene family expression, determination by *in situ* hybridization, 493
Immunohistochemistry
adenoma-carcinoma sequence in rectal adenomas and, 121
of CEA, in fetal pancreas, adult pancreatitis and pancreatic adenocarcinoma and, 17
characterization of myoepithelial cell presence in chondroid syringoma, 493
of chondroid syringomas, 662
in combined hepatocellular-cholangiosarcoma, with variable sarcomatous transformation, 309
diagnosis of melanoma by, comparison of HMB-45 monoclonal antibody and S-100 protein in, 385
differential diagnosis of malignant melanoma and malignant fibrous histiocytoma and, 493
of estrogen receptor protein, in paraffin sections, 559
ficin in, 754
foundations of, 333
in glioblastoma multiforme, role of renin in neovascularization and, 437
in hairy-cell leukemia, anti-leukocyte common antigen and, 412
immature neural elements and, in immature teratomas, 397
immunoreactivity for alpha-1-antichymotrypsin and, in different types of tumors, 131
immunoreactivity of monoclonal antibodies and, in ovarian carcinoma, 391
of malignant lymphoma, of central nervous system, 493
of malignant melanoma, using antibodies to vimentin, S-100 and HMB-45, 493
in mantle zone lymphoma, 143
in non-Hodgkin's lymphoma of ovary, 156
phenotyping of colorectal adenocarcinomas by, with monoclonal antibodies, 493
in plasma cell granuloma of breast, 627
of primary breast carcinoma, estrogen receptors in, 233
prostate carcinogenesis and, impaired cell differentiation and, 23
quantitative, 324
in small cell and non-small cell lung cancers, neuroendocrine differentiation and, 641
of squamous metaplasia of prostate, 597
Immunohistology, *in situ* hybridization compared with, in detection of Cytomegalovirus infections, 493
Immunological analysis, of plasma cell malignancy, in AIDS, 493
Immunology, 333
in acute nonlymphocytic leukemia, terminal deoxynucleotidyl transferase and, 421
in intestinal anisakiasis, 107
Immunoperoxidase
diagnosis of melanoma by, comparison of HMB-45 monoclonal antibody and S-100 protein in, 385
with HMB-45 antibody, in diagnosis of melanoma, 77
immature neural elements and, in immature teratomas, 397
in immunohistochemistry, 333
urine sediment examination and, using monoclonal antibodies, 691
Immunophenotype
heterogeneity of, in normal and neoplastic B-cell proliferations, detected by monoclonal antibodies, 149
of non-Hodgkin's lymphoma
in childhood, 103
paraffin section, using panel of monoclonal antibodies, 564
Immunosuppressed patients, fungal pathogen in, 493
Imprints, of brain tumors, 493
Infectious diseases, antimicrobial susceptibility testing and, 355
Infectious mononucleosis, heterophil-negative illnesses like, with atypical lymphocytosis, seroconversions to HIV and, 169

Inflammatory bowel disease, deep venous thrombosis and, protein S and, 633
In Memoriam
George H. Fetterman, M.D., 638
Lall Greenway Montgomery, M.D., 636
In situ hybridization, in diagnostic pathology, 340
Intermediate filaments
in immature teratomas, 397
immunostaining of paraffin sections and, 33
Intracytoplasmic bodies
in hairy-cell leukemia, 459
large, 119
Intravenous site, discontinued, effect of drawing blood samples proximal to, 702
Intrinsic factor antibody, in pernicious anemia, 442
Iron deficiency
bone marrow iron stores and, ferritin and erythrocyte sedimentation rate to predict, 85
differentiating from thalassemia minor, red cell discriminant function incorporating RDW for, 493
red blood cell fragmentation and, 268

J

5' JH HVR, in leukemia, 187

K

Kaposi's sarcoma, endothelial cell marker in, phenotype differentiation of, 493
Keratin, in combined hepatocellular-cholangiosarcoma, with variable sarcomatous transformation, 309
insensitive test for, 751
Kidney
angiomyolipomas of, relationship to cysts, tuberous sclerosis, and renal cell carcinoma, 493
donor, contamination by starch from surgical gloves, 81
Kodak EKTACHEM clinical chemistry slides, for serum magnesium assay, using EKTACHEM 700 analyzer, 493

L

Labeling index, in prostate carcinoma, in needle biopsy, 493
Laboratory standardization, detection, evaluation, and treatment of elevated cholesterol levels and, 358
Laboratory tests, improved methods for evaluating performance of, 493
selection for utilization review, by microcomputer, 493
Lactate dehydrogenase isoenzyme(s), evaluation of protocol for, 613
Lactate dehydrogenase isoenzyme electrophoresis, in hypergammaglobulinemia, 197
Lamellar bodies, in amniotic fluid, characterization by resistive-pulse counting, lung maturity and, 493
Laser probe, "hot tip," ablation of atherosclerotic plaque using, 493
LD_1/LD_2 ratio, 613
Leiomyomas, uterine
asymmetrical distribution of, 493
myometrial hyperplasia and metaplasia and, 493
Leprosy, lepromatous, nongranulomatous involvement of bone marrow in, 493
Leu-4 (CD3) antigen, expression in neoplastic cells, from T-ALL and T-lymphoblastic lymphoma, 244
Leu-7, in small cell and non-small cell lung cancers, neuroendocrine differentiation and, 641
Leu-M1, analysis of ploidy and, in malignant epithelial mesothelioma, 240
Leu-M5 (CD11c), evaluation by alkaline phosphatase anti-alkaline phosphatase technique, in hairy-cell leukemia, 250
Leukemia
acute myeloblastic
DNA polymorphism to JH region of immunoglobulin heavy chain in, 187
immunoglobulin gene rearrangements in, 187
acute myelogenous, with eosinophilic differentiation and trisomy-1, 464
acute nonlymphocytic, terminal deoxynucleotidyl transferase in, 421
chronic lymphocytic, central nervous system involvement, non-Hodgkin's lymphoma (Richter's Syndrome), 750
characterization of, Technicon H-1 in, 493
hairy-cell
anti-leukocyte common antigen and, 412
hematologic evaluation of, 679
Leu-M5 (CD11c) in, alkaline phosphatase anti-alkaline phosphatase technique, for evaluation of, 250
specific skin lesions as presenting symptom of, 459
vasculitis associated with, 493
myeloid, juvenile, chronic, 575
promyelocytic, microgranular, multiparameter approach to, 493
T-ALL, Leu-4 antigen expression in neoplastic cells from, 244
Leukemoid reaction, epithelioid sarcoma with, 723
Leukopenia, occupational, hematologic evaluation of, 679
Leukoplakia, hairy, herpes-type virions in, ultrastructural detection of, 305
Lipase levels, lack of usefulness in diagnosis of pancreatitis, in neurosurgical intensive care unit patients, 493
Lip biopsies, from patients with Sjogren's syndrome-like illness associated with ARC, histopathology and lymphocyte immunophenotypes in, 493
Lipiodol, deposition and drainage in hepatocellular carcinoma, after injection into feeding hepatic artery, 536
Lipid panel, fully automated, 493
Lipoproteins, elevated levels of, detection, evaluation, and treatment of, 358
Liver isoenzymes, agarose gel patterns of, before and after treatment with neuraminidase, 181
Liver neoplasm, combined hepatocellular-cholangiosarcoma, with variable sarcomatous transformation, 309
Lung, fetal, maturity of, characterization of amniotic fluid lamellar bodies and, 493
Lung cancer
non-small cell, neuroendocrine differentiation in, 641
small cell, neuroendocrine differentiation in, 641
Lupus anticoagulant, sensitivity of various laboratory tests at different levels of APTT and, 493
Lupus erythematosus cells, in skeletal muscle biopsy, 731
Lymphadenopathy
in Fabry's disease, 726
with heterophil-negative mononucleosis-like illnesses, seroconversion to HIV and, 169
massive, sinus histiocytosis with, 641
Lymph nodes, axillary, common reactive erythrophagocytosis in, 189
Lymphocyte(s)
granular, large, enumeration and sex difference of, 674
immunophenotypes of, in lip biopsies, from patients with Sjogren's syndrome-like illness associated with ARC, 493
responsiveness of, *in vitro,* of uremic patients on hemodialysis, 493
villous, splenic lymphoma with, Leu-M5 (CD11c) in, 250
Lymphocytoma, atypical, with heterophil-negative mononucleosis-like illnesses, seroconversion to HIV and, 169
Lymphofollicular hyperplasia, of thymus, genotypic evidence for polyclonality of B- and T-lymphocytes in, 493

Lymphoma
B-cell
immunophenotypic heterogeneity and, 149
monocytoid, 742
chronic lymphocytic, central nervous system involvement, 750
concordant cell surface, immunoglobulin and immunophenotypic markers, 750
of central nervous system, stereotaxic biopsy diagnosis of, 40
follicular
mimicking progressive transformation of germinal centers, 517
with and without spontaneous regression, host cell infiltrates in, 257
gastric, 493
Hodgkin's, prognostic value of DNA ploidy and proliferative activity in, 670
immunoblastic, pseudo-Gaucher cells preceding appearance of, 454
lymphoblastic, extranodal, non-T-cell, in adults, 602
lymphocytic, intermediate, immunohistochemical study of, 143
malignant, of central nervous system, immunohistochemical and clinicopathologic study, of, 493
mantle zone, immunohistochemical study of, 143
non-Hodgkin's
central nervous system involvement, 750
of ovary, immunotypic and genotypic characterization of, 156
paraffin section immunophenotyping of, 564
pre-B-cell, non-Hodgkin's, in childhood, 103
splenic, Leu-M5 (CD11c) in, alkaline phosphatase anti-alkaline phosphatase technique, for evaluation of, 250
T-lymphoblastic, Leu-4 antigen expression in neoplastic cells from, 244

M

Macroglobulinemia, in mantle zone lymphoma, immunohistochemical study of, 143
Macrophages, activated, in sarcoid granulomas, 545
Maggots, blowfly, in scalp, 734
Magnesium, serum, Kodak EKTACHEM clinical chemistry slides for assay of, 493
Malignancy
plasma cell, in AIDS, immunologic analysis of, 493
or prostate, premalignant phase of, impaired cell differentiation in, 23
Manpower
needs for, in community hospital and private laboratory practice, 482
oversupply of, 517
Mean corpuscular hemoglobins, in α-thalassemia, 193
Mean corpuscular volumes, in α-thalassemia, 193
Melanin pigment, avoiding problem of, 521
Melanoma
amelanotic, cytodiagnosis of, 77
cytodiagnosis of, 77
immunohistochemical diagnosis of, comparison of HMB-45 monoclonal antibody and S-100 protein in, 385
malignant
immunohistochemical study of, using antibodies to vimentin, S-100 and HMB-45, 493
malignant fibrous histiocytoma and, immunohistochemical and ultrastructural differential diagnosis of, 493
Melanosis, of prostate, 530
Melanosomes, in blue nevus and melanosis of prostate, 530
Mesothelioma, epithelial, malignant, flow cytometric analysis of ploidy in, 240
Metaplasia
gastric, prevalence in normal population, 711
squamous, of prostate, 597
Metastases
to bone marrow, of epithelioid sarcoma, 723
to heart, 493
of occult carcinomas of thyroid, 72
to stomach, detection through endoscopic "salvage" cytology, 493
Metyrapone test, in Cushing's syndrome, 345
Microbiology
antimicrobial susceptibility testing and, 355
clinical, need for operational research in, 119
Mobility, relative, of alkaline phosphatase isoenzymes, before and after treatment with neuraminidase, 181
Monoclonal antibodies
detection of estrogen receptors with, in paraffin sections, 120
estrogen receptors and, in breast cancer, 233, 559
evaluation by alkaline phosphatase anti-alkaline phosphatase technique, in hairy-cell leukemia, 250
immunocytologic dissection of urine sediment using, 691
in immunohistochemical diagnosis of melanoma, S-100 protein compared with, 385
immunohistochemical phenotyping of colorectal adenocarcinomas with, 493
immunoperoxidase staining with, in diagnosis of melanoma, 77
in mantle zone lymphoma, immunohistochemical study of, 143
ovarian carcinoma and, immunohistochemical and immunocytochemical techniques compared and, 391
paraffin section immunophenotyping of non-Hodgkin's lymphoma using, 564
in pre-B-cell non-Hodgkin's lymphoma, in childhood, 103
Monocytes, in acute nonlymphocytic leukemia, terminal deoxynucleotidyl transferase and, 421
Mucormycosis, fluorescence of, 229
Mucus, depletion of, in *Campylobacter pylori* mediated gastritis, 493
Multicentricity, in occult carcinomas of thyroid, 72
Multiple myeloma, bone marrow fibrosis in, 753
Multiple sclerosis, acute phase, abnormal glucose tolerance relationship to, 493
Multivariate analysis, in Hodgkin's disease, prognostic value of DNA ploidy and proliferative activity and, 670
Muscle, biopsy of, hematoxylin-stained bodies and tissue LE cells in, 731
Mycobacteria, isolation in children, 493
Mycoplasma infection, genital, perinatal, pathologic manifestations of, 493
Myiasis, *Phormia regina,* in scalp, 734
Myocardial infarction
acute
false negative cardiac enzyme studies in, 493
fatal, coronary artery plaque composition in, 493
quantification of CK-MB isozyme and, comparison of methods for, 493
screening for, lactate dehydrogenase isoenzymes and, 613
Myoepithelial cells, in chondroid syringoma, immunohistochemical characterization of evidence of, 493
Myometrial hyperplasia, uterine leiomyomas and, 493
Myometrial metaplasia, uterine leiomyomas and, 493

N

Natural killer cells, enumeration and sex differences of, 674
Negative staining, ultrastructural detection of herpes-type virions by, in hairy leukoplakia, 305

Nematodes, in intestinal anisakiasis, morphologic and immunologic diagnosis of, 107
Neoplasms
  combined hepatocellular-cholangiosarcoma, with variable sarcomatous transformation, 309
  immunoreactivity for alpha-1-antichymotrypsin and, 131
  metastatic, in stomach, detection through endoscopic "salvage" cytology, 493
  small cell, of ovary, ultrastructural analysis of, 523
  urethral, in females, 493
Neovascularization, in glioblastoma multiforme, role of renin in, 437
Nephrocalcinosis, malignant ameloblastoma with, 474
Nerve growth factor, benign glandular inclusions in parotid nerve and, 220
Neuraminidase, agarose gel patterns of alkaline phosphatase isoenzymes before and after treatment with, 181
Neuroendocrine antigens, differential expression of, in pulmonary and gastrointestinal carcinoid tumors, 493
Neuroendocrine differentiation, in small cell and non-small cell lung cancers, 641
Neurofilament, in immature teratomas, 397
Neuronal differentiation, in immature teratomas, 397
Neuron-specific enolase
  in immature teratomas, 397
  in small cell and non-small cell lung cancers, neuroendocrine differentiation and, 641
Neurosarcoidosis, abnormal CSF parameters in, 493
Neutrophils, chemotaxis of, inhibition of, by recombinant human tumor necrosis factor, 493
Newborn, mild hemolytic disease of, 493
Newborn metabolic screening, source of error in, 279
News and Notices, 492, 231, 249
Nonfluorescent Y, unilateral microscopic gonadoblastoma and, 622
Nosocomial infection, of *Fusarium solani* osteomyelitis, 738
Nuclear roundness factor, Gleason score compared with, in evaluation of adenocarcinoma of prostate, 493
Nucleic acids, in diagnostic pathology, 340

O

Obstetrics, human, 366
Ochronosis, osteoarthrosis associated with, 95
Oligonucleotide probes, alkaline phosphatase conjugated, use to detect HIV in cell and tissue samples, 493
Oral anticoagulants, therapeutic control of, 685
Osler-Weber-Rendu disease, 274
Osmotic fragility test, for hereditary spherocytosis, 493
Ossification, pulmonary, dendriform, 493
Osteoarthritis, associated with ochronosis, 95
Osteoarthrosis, associated with ochronosis, 95
Osteodystrophy, renal, bone biopsies and, 493
Osteomyelitis, *Fusarium solani*, with probable nosocomial spread, 738
Ovary
  carcinoma of, tumor markers for, 391
  non-Hodgkin's lymphoma of, immunotypic and genotypic characterization of, 156
  small cell carcinoma of, ultrastructural analysis of, 523
Ovum, human, 366

P

Pancreatic islets, fetal, cytomegalovirus infection of, 52
Pancreatitis
  in adult, immunohistochemistry of CEA in pancreas during development and, 17
  diagnosis of, lack of usefulness of lipase levels in, in neurosurgical intensive care unit patients, 493
Papilloma, Schneiderian, spectrum of carcinoma in, 493
Paraffin sections
  detection of estrogen receptors in, with monoclonal antibodies, 120
  estrogen receptor protein in, immunohistochemistry of, 559
  immunophenotyping of non-Hodgkin's lymphoma by, using panel of monoclonal antibodies, 564
Paraproteins, adaptation of immunoblot technique for rapid typing of, 493
Parasitemia, enhanced detection of, in routing hematology laboratory, 493
Parasitologic examination, routine, direct wet mounts versus concentration for, 323
Parietal cell antibody, in pernicious anemia, 442
Parotid gland, benign lymphoepithelial cysts of, in HIV-positive patients, 493
Pathologist, Paul Ehrlich, 329
Pathology
  diagnostic, DNA probes in, 340
  gynecologic, 366
    as subspecialty, 362
  manpower needs for
    in community hospital and private laboratory practice, 482
    oversupply in, 517
  patterns of, 326, 327
Pediatric patients
  AIDS in, bone marrow pathology in, 493
  chronic granulomatous disease in, *Aspergillus nidulans* var. *eichinulatus* in, 312
  HemoCue system for hemoglobin measurement in, 302
  high-risk, usefulness of gentamicin pharmacokinetics service and, 493
  mild hemolytic disease of newborn and, 493
  mycobacterial isolation in, 493
  plasma viscosity in, measurement using new capillary viscometer, 493
  pre-B-cell non-Hodgkin's lymphoma in, 103
  renal artery dysplasia in, 493
Pepsin, immunostaining of paraffin sections and, 33
Pepsinogen, in pernicious anemia, 442
Perineural invasion, benign glandular inclusions in parotid nerve and, 220
Phenylalanine, blood, measurement of, source of error in, 279
Phenylketonuria, screening for, source of error in, 279
Phlebotomy, effect of drawing blood samples proximal to in-place but discontinued intravenous solution, 702
Phormia regina myiasis, in scalp, 734
Plasma cell granuloma, of breast, 627
Plasma viscosity, in pediatric patients, measurement using new capillary viscometer, 493
Plasminogen, discrepant changes in, by two different assays, in patients receiving streptokinase, 200
Platelet aggregation, in thrombocytosis, essential and reactive, 431
Platelet aggregometry, whole blood, using impedance and particle counter methods, 493
Plateletapheresis, comparison of CS-3000 blood cell separator using closed system and open system kits for, 300
Platelet compatibility testing, solid phase red blood cell adherence method for, 63
Platelet count, stability of, in healthy subjects, 262
Platelet crossmatching, 114
  for alloimmunized thrombocytopenic patient, 69
  solid red blood cell adherence method for, 63
Platelet storage, 230
Platelet transfusion, comparison of CS-3000 blood cell separator using closed system and open system kits for, 300

Platelet volume, 230
in thrombocytosis, essential and reactive, 431
Ploidy, flow cytometric analysis of, in malignant epithelial mesothelioma, 240
Pneumonia, *Pneumocystis carinii*, in AIDS, spectrum of pathologic manifestations of, 493
Polymerase chain reaction, detection of human papillomavirus using, in invasive squamous carcinoma, 493
Postgraduate medical education, in gynecologic pathology, 362
Practice development, in interventional cytopathology, 351
Predictive value, of ferritin and erythrocyte sedimentation rate, for bone marrow iron stores, in anemic patients, 85
Pregnancy
early, decidual vascular changes in, as marker for intrauterine pregnancy, 284
extrauterine, Arias-Stella phenomenon in diagnosis of, 284
Pretransfusion testing
for platelet compatibility, solid red blood cell adherence method for, 63
platelet crossmatching and, 114
selection of platelet transfusions for alloimmunized thrombocytopenic patient, 69
positive direct antiglobulin tests in, determination of need for elution studies for, 58
Products of conception, cytologic evaluation of, effectiveness of, 493
Progesterone receptor, in breast cancer, immunocytochemical detection of, 137
Proliferative activity, in Hodgkin's disease, prognostic value of, 670
Prostaglandin E_2, malignant ameloblastoma and, 474
Prostate
adenocarcinoma of, comparison of Gleason score and nuclear roundness factor in, 493
blue nevus and melanosis of, 530
carcinogenesis in, impaired cell differentiation in premalignant phase of, 23
carcinoma of, labeling index and flow cytometry of, in needle biopsies, 493
squamous metaplasia of, 597
Protein, urinary, dipstick analysis of, 493
Protein C, inflammatory bowel disease with deep venous thrombosis and, 633
Protein S, inflammatory bowel disease with deep venous thrombosis and, 633
Proteolytic enzymes with ficin, for immunostaining of paraffin sections, 33
Prothrombin time, therapeutic control of oral anticoagulant treatment and, D0045
Pseudo-Gaucher cells, preceding appearance of immunoblastic lymphoma, 454
Pseudohyperparathyroidism, malignant ameloblastoma with, 474
Pseudosarcoma, transitional cell carcinoma of urinary bladder with, 216
Pseudotumor, inflammatory, of breast, 627
Pulmonary ossification, dendriform, 493
Pyrrolidonyl aminopeptidase, identification of group A streptococci by, 210

Q

Quality control, of hematologic studies, stability of results in healthy subjects and, 262

R

Radioallergosorbent test, in intestinal anisakiasis, 107
Radioimmunoassay
of β-thromboglobulin, 610
effects of extraneous radioactivity on, 493
Radioimmunodiffusion assays, plasminogen changes assayed by, fluorogenic synthetic substrate compared with, 200
Radiolabeled antiglobulin test, platelet crossmatching and, for alloimmunized thrombocytopenic patient, 69
Rapid diagnosis, of *Campylobacter pylori*, by Gram's stain, 606
RapSTR system, identification of *Viridans* streptococci by, 87
RDW
nomogram correction for MCV and, 493
red cell discriminant function incorporating, to differentiate iron deficiency anemia from thalassemia minor, 493
Red blood cell breakdown, breast biopsy and, 189
Red blood cell distribution width, rheumatoid arthritis and, 116
Red blood cell fragments, 268
Red cell abnormalities, in microcytic and other anemias, H-1 system to detect, 493
Red cell discriminant function, incorporating RDW, to differentiate iron deficiency anemia from thalassemia minor, 493
Renal artery, dysplasia of, in children, 493
Renal cell carcinoma, adenomyolipomas of kidney related to, 493
Renal medulla, sole use of, in diagnosis of acute cellular rejection, 493
Renal osteodystrophy, bone biopsies and, 493
Renal transplant, undifferentiated tumor of donor origin in recipient of, 493
Renin, in glioblastoma multiforme, role in neovascularization, 437
Residency training, in gynecologic pathology, 362
Resistive-pulse counting, characterization of amniotic fluid lamellar bodies by, fetal lung maturity and, 493
Respiratory syncytial virus, feasibility of testing for, in community hospital laboratory, 175
Restriction fragment analysis, of unilateral microscopic gonadoblastoma, in prepubertal Turner mosaic, 622
Reticulocyte count, usefulness for determination of successful engraftment in bone marrow transplant, 493
Rheumatoid arthritis, red blood cell distribution width and, 116
Richter's Syndrome, central nervous system involvement, concordant cell surface immunoglobulin, and immunophenotypic markers, 750
Rickettsia, leukocytic, morphologic study of, 493
Risk factors, detection, evaluation, and treatment of elevated cholesterol levels and, 358
RNA probes, in diagnostic pathology, 340
Rough endoplasmic reticulum, dilated, in small cell carcinoma of ovary, 523

S

Salivary gland
benign glandular inclusions in parotid nerve and, 220
fine-needle aspiration of, 46
Saphenous vein grafts, aorto-coronary, failed, intraluminal thrombosis of coronary arteries and, 493
Sarcoidosis, calcium oxalate in, 545
Sarcoma
combined hepatocellular-cholangiosarcoma, with variable sarcomatous transformation, 309
epithelioid, with diffuse bone marrow metastases and associated leukemoid reaction, 723
Kaposi's, endothelial cell marker in, phenotype differentiation of, 493
Scalp, *Phormia regina* myiasis in, 734
Schaumann bodies, in sarcoid granulomas, 545
Screening
for myocardial infarction, lactate dehydrogenase isoenzymes and, 613
in office, for hemoglobin levels, HemoCue system for, 302
phenylketonuria, source of error in, 279
predonation, for alanine aminotransferase, table-top analyzer for, 296
Sex difference, of large granular lymphocytes, 674

Sickle cell disease, HemoCue® system for hemoglobin measurement in, 302
Sjogren's syndrome-like illness, associated with AIDS-related complex, lip biopsies and, histopathology and lymphocyte immunophenotypes in, 493
Skin, mixed tumor of, immunohistochemical characterization of, 662
Skin lesions, in hairy-cell leukemia, 459
Smears, of brain tumors, 493
Solid phase red blood cell adherence method, for pretransfusion platelet compatibility testing, 63
S-100 protein
antibodies to, in immunohistochemistry of malignant melanoma, 493
in blue nevus and melanosis of prostate, 530
in immunohistochemical diagnosis of melanoma, monoclonal antibody compared with, 385
in juvenile chronic myeloid leukemia, 575
Spectrin, red blood cell fragmentation and, 268
S-phase fraction, in Hodgkin's disease, prognostic value of, 670
Spherocytosis, hereditary, osmotic fragility test for, 493
Spontaneous regression, of follicular lymphoma, comparison of host cell infiltrates in, 257
Staining
hematoxylin, in muscle biopsy, in systemic lupus erythematosus, 731
for identifying *Campylobacter pylori*, evaluation of, 450
immunocytochemical, in sarcomatoid carcinoma of urinary bladder, 653
immunoperoxidase
urine sediment examination and, using monoclonal antibodies, 691
with HMB-45, in diagnosis of melanoma, 77
negative, ultrastructural detection of herpes-type virions by, in hairy leukoplakia, 305
proteolysis with ficin in, for paraffin sections, 33
Starch, from surgical gloves, contamination of perfused donor kidneys by, 81
Stereological parameters, in diagnosis and prognosis of cirrhosis, 493
Stereotaxic biopsy, for diagnosis of central nervous system lymphoma, 40
Stereoid receptors, in breast cancer, immunocytochemical detection of, 137
Streptococci
group A, identification by pyrrolidonyl aminopeptidase, 210
Viridans, identification by three commercial methods, 87
Streptokinase, discrepant changes in plasminogen by two different assays in patients receiving, 200
Stroma cells, atypical, in transitional cell carcinoma of urinary bladder, 216
Sudden death, prolonged antipsychotic drugs and, 493
Survival
in astrocytoma, correlation of DNA content and histology in prognosis of, 289
in Hodgkin's disease, prognostic value of DNA ploidy and proliferative activity for, 670
Syncytial virus, respiratory, feasibility of testing for, in community hospital laboratory, 175
Syringoma, chondroid, myoepithelial cell presence in, immunohistochemical characterization of, 493, 662
Systemic lupus erythematosus
anticardiolipin antibody in, ELISA for detection of, 591
muscle biopsy in, hematoxylin-stained bodies and tissue LE cells in, 731

T

Tartrate-resistant acid phosphatase, in hairy-cell leukemia, 459
Technicon H-1 automated hematology analyzer, estimation of CD4 cell count using, 493
Technology assessment, of detection of positive blood cultures by Bactec NR660, 91
Telangiectasia, hemorrhagic, hereditary, 274
Teratoma, immature, immature neural elements in, 397
Terminal deoxynucleotioyl transferase
in acute nonlymphocytic leukemia, 421
in extranodal non-T-cell lymphoblastic lymphoma, in adults, 602
Testing efficiency, cerebrospinal fluid trap and, 707
α-Thalassemia, hematologic changes in, 193
Thalassemia minor, differentiating iron deficiency anemia from, red cell discriminant function incorporating RDW for, 493
Therapeutic control, of oral anticoagulant treatment, 685
Thrombocytopenia
alloimmunity in, selection of platelet transfusions for, 69
immune, in infants, congenital HIV infection and, clonal B-cell proliferation in, 470
laboratory evaluation of, 493
Thrombocytosis
essential, platelet parameters and aggregation in, 431
reactive, platelet parameters and aggregation in, 431
β-Thromboglobulin, radioimmunoassay of, 610
Thrombolytic therapy, discrepant changes in plasminogen by two different assays in patients receiving, 200
Thrombosis, intraluminal, of coronary arteries, failed aorto-coronary saphenous vein grafts and, 493
Thymoma, differentiating thymic carcinomas from, Ki-67 and T6 (CD1) in, 493
Thymus, lymphofollicular hyperplasia of, genotypic evidence for polyclonality of B- and T-lymphocytes in, 493
Thyroid
Hürthle cell tumors of, clinical outcome of, 493
occult carcinomas of, 72
Thyroiditis, Reidel's, 715
Time study, in testing for respiratory syncytial virus, 175
T-lymphocytes
in follicular lymphoma, with and without spontaneous regression, 257
polyclonality of, in lymphofollicular hyperplasia of thymus, 493
Tomographic sections, three-dimensional reconstruction from, using microcomputer, 493
Touch preparations, rapid diagnosis of *Campylobacter pylori* and, 606
Toxic exposure, leukopenia and, hematologic evaluation of, 679
Transcatheter arterial embolization, iodized oil and, 536
Transfusions
pretransfusion testing and, platelet crossmatching and, 114
positive direct antiglobulin tests in, need for elution studies for, 58
selection of platelet transfusions for alloimmunized thrombocytopenic patient, 69
solid red blood cell adherence method for, platelet compatibility and, 63
Trisomy-1, in acute myelogenous leukemia, 464
Trypsin, estrogen receptors in paraffin sections and, immunohistochemistry of, 559
Tuberculosis, changing patterns of, 493
Tuberous sclerosis, adenomyolipomas of kidney related to, 493
Tumor
of brain
imprints, smears, and frozen sections of, 493
stereotaxic biopsy diagnosis of, 40
undifferentiated, of donor origin, in renal transplant recipient, 493
Tumor necrosis factor, human, recombinant, upregulation of C3bi receptor and inhibition of chemotaxis of neutrophils b, y, 493
Turner mosaic, unilateral microscopic gonadoblastoma in, restriction fragment analysis in, 622

U

Ultrastructure
in acute nonlymphocytic leukemia, terminal deoxynucleotidyl transferase and, 421
of blood-brain barrier, in rabbits given gentamicin sulfate, 493
detection of herpes-type virions by negative staining and, in hairy leukoplakia, 305
differential diagnosis of malignant melanoma and malignant fibrous histiocytoma and, 493
of immature neural elements, in immature teratomas, 397
of small cell carcinoma of ovary, 523
Uremia, hemodialysis and, *in vitro* lymphocyte responsiveness and, 493
Urethral neoplasms, in females, 493
Urinary bladder
sarcomatoid carcinoma of, 653
transitional cell carcinoma of, with pseudosarcomatous stroma, 216
Urine
dipstick screening tests for, ranking and evaluating, 118
drugs of abuse in, semi-quantitative assays for, 493
proteins in, dipstick analysis of, 493
semi-quantitative methods for drugs of abuse in, 493
Urine sediment examination, immunocytologic, using monoclonal antibodies, 691
Uterus, leiomyomas of, asymmetrical distribution of, 493
myometrial hyperplasia and metaplasia and, 493
Utilization review, selection of laboratory tests for, by microcomputer, 493

V

Vasculitis, associated with hairy-cell leukemia, 493
Venereal disease research laboratory, cerebrospinal fluid TRAP and, 707
Venipuncture, effect of drawing blood samples proximal to in-place but discontinued intravenous solution, 702
Vimentin
antibodies to, in immunohistochemistry of malignant melanoma, 493
in combined hepatocellular-cholangiosarcoma, with variable sarcomatous transformation, 309
in immature teratomas, 397
in sarcomatoid carcinoma of urinary bladder, 653
Viridans streptococci, identification by three commercial systems, 87
Viscoelastic coagulation analyzer, to measure kinetics of human fibrin glue clotting, 493
VISION®, evaluation of, 493
Vitamin B_{12}, deficiency of, serum homocystein as an indicator of, 446
Vitronectin, in breast and colon carcinomas, 7

W

Warthin-Starry staining, for identifying *Campylobacter pylori*, 450
White blood cell differential
automated, to triage blood specimens for microscopic examination, 163
stability of, in healthy subjects, 262
Whole blood platelet aggregometry, using impedance and particle counter methods, 493
Wilms' tumor, extrarenal, in adults, 618

X

Xanthoma, of bone, 377

Z

"Zebra-like" inclusion, in Fabry's disease, 726

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION (Act of August 12, 1970: Section 3685, Title 39 United States Code) Date of Filing—October 1, 1988. Title of Publication—American Journal of Clinical Pathology; Frequency of Issue—Monthly; Annual Subscription Price—$79.00; Location of Known Office of Publication—Downsville Pike, Rt. 3, Box 20-B, Hagerstown, MD 21740; Location of the Headquarters or General Business Offices of the Publisher—East Washington Square, Philadelphia, PA 19105; Publisher—American Society of Clinical Pathologists, East Washington Square, Philadelphia, PA 19105; Editor—Myrton F. Beeler, M.D., Louisiana State University Medical Center, New Orleans, LA 70112; Managing Editor—Theresa Rosen, East Washington Square, Philadelphia, PA 19105; Owner—American Society of Clinical Pathologists, 2100 W. Harrison Street, Chicago, IL 60612; Known Bondholders, Mortgagees and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages or other securities—None. A. Total no. copies printed (*net press run*), average 15,883, actual 17,000; B. Paid circulation 1. Sales through dealers and carriers, street vendors and counter sales, average, none, actual, none; 2. Mail subscriptions, average 14,368, actual 13,901; C. Total paid circulation, average 14,368, actual 13,901; D. Free distribution by mail, carrier or other means. Samples complimentary, and other free copies, average 807, actual 56; E. Total distribution (*sum of C and D*), average 15,175, actual 13,957; F. Copies not distributed 1. Office use, leftover, unaccounted, spoiled after printing, average 708, actual 3,043, 2. Returns from news agents, none; G. Total (*sum of E & F—should equal net press run shown in A*), average 15,883, actual 17,000. I certify that the statements made by me above are correct and complete. Tish Packman, *Circulation Manager*.
